

IntelliCentrics
Experience SEC³URE Healthcare

SEC³URE Home Health

The UK home healthcare segment is a key component focus within the NHS Long Term Plan. And for good reason. With recognition that a technology first approach will change the model of care significantly, with care in the home allowing for patients to manage their own health more proactively. These advancements, make it is easy to understand the promising future of home-based care and how critical it is to the UK population.

For the potential to be fully realised, home healthcare companies must deliver on three key values:

- 1 Comply with credentialing requirements to minimise risk for all parties
- 2 Ensure a safe working environment for practitioners
- 3 Be trusted by the patient, their family, and their friends

Current processes struggle to deliver on these essential values. As a result, they are severely impacting the potential of home healthcare.

TRUSTED SOLUTION

The home healthcare needs a solution that provides bilateral trust between care givers and care receivers, the ability to trust the safety of the practitioners visiting, and to trust practitioners comply with all regulatory requirements to ensure a practical and efficient solution. And, it has to work as well across the street as it does across the country.

That's exactly what happens within the IntelliCentrics SEC³URE Passport. Patients can trust who will visit their homes, practitioners can trust the environment they will be visiting, and home healthcare companies can trust they will be reimbursed because they can trust their practitioners comply with the regulations. The magic of the SEC³URE Passport lies in its independence whilst delivering trust to all stakeholders concurrently.

At IntelliCentrics, trust is at the core of everything we do. Our company's vision is to be the world's trusted solution for trust.

We believe trust has the power to transform healthcare for the better.

Everyone wins with IntelliCentrics.
